Royster's "cured" fertilizer is certified fertilizer

More profitable crops result from the use of fertilizer that has been thoroughly "aged"

You can't look at the ordinary bag of fertilizer and tell how good it is. You have to risk the time and money of a season's work before you KNOW. It isn't known to be good until you get your money!

Certified Fertilizer

But Royster's "cured" fertilizer is like a certified check.

It is certified by the forty years we have spent in learning the needs of the soil you work.

It is certified by the experience of successful farmers all about you, who say "Royster's fertilizer increased my earnings.

"Cured" Fertilizer is better plant food

It is certified by the "curing"a feature of Royster's fertilizer which increases its value because of a more complete chemical action, making the plant food readily available to the plant. (Royster's goods age in great bins for four to six months. They are then re-milled and bagged).

Ask for "Royster's"

Stop guessing about fertilizer. Look for the name "Royster" on your bags of fertilizer and you have found the assurance that your crops will have proper feeding from seed time to harvest.
